Prices shown are for orders picked up at our Woodinville location. All frameless panels shipping via a freight carrier will have to be packaged or palletized. **Charges are \$35.00 to package/palletize plus \$155.00 per order, per address.** Call for additional freight costs outside of these following states: Washington, Oregon, Idaho, Montana, Utah, Nevada, Wyoming, Arizona and Colorado.

TRANSPORTING FRAMELESS GLASS BLOCK PANELS

We recommend that panels be transported vertically. This can be achieved by transporting the panels in a truck or van. If this is not an option available to you, please bring blankets and any other materials needed to protect your vehicle as well as the panels. Please note Seattle Glass Block Windows, Inc. is not responsible for any damage occurring to vehicles while loading panels. This also applies to any damage to panels caused by transportation.

PREFABRICATED FRAMELESS PANEL INSTALLATION RECOMMENDATIONS:

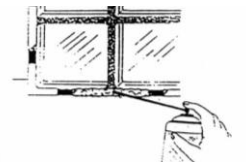

Step 1: Use 1/4" shims on the bottom and both sides. Your finished opening should be framed at 1/4" over the panel dimension on both width and height. The panel will always be undersized from the nominal dimension. All net openings for glass block panels are presented width by height and should be listed on the previous pages. If in doubt please call (425) 483-9977.

Step 1

Step 2: Spray non-expanding foam around the perimeter in the vacant area between the panel and your opening.

Step 2

Step 3: Trim off the excess foam and caulk the 1/4" expansion joint around the perimeter of the panel. Additional trim work may now be done.

Step 3
